

I have known Thomas Garrison for upwards of thirty years - met with him during the Mexican invasion wars, in which he acted the part of a good citizen, was therefore I doubt not, a sufferer in common with his fellow citizens in the loss of much property by the invading army, and also by the Army of Texas. An attested statement of the losses sustained by Mr. Garrison, amounting to \$770. having been shown me, I have no hesitation in ~~saying~~^{saying} that I believe him to be utterly incapable of making any account not founded on truth. I further believe that the then citizens of Texas will never get fully paid for the losses and privations sustained by them during that trying period, notwithstanding the well known liberality of the Legislature.

Mr. Garrison was also with us at the battle of Velasco.
I believe 27th June 1832.

J. H. McNeil.
